EXPERIENCE

Bluebridges, South Africa (remote) — Mobile Developer(react native)

April 2023 - October 2023

- Developed a mobile application enabling users to quickly report emergencies by sending real-time, geolocation-based alerts to law enforcement agencies.
- Integrated precise geolocation tracking and secure data transmission protocols to ensure rapid and accurate emergency responses.
- Collaborated with cross-functional teams to refine the user interface and overall user experience, particularly under high-stress situations.
- Conducted rigorous testing and optimization, ensuring the application remained reliable and efficient even during peak usage times.

OOD Technology, Akure Nigeria (remote) — Frontend Engineer

January 2023 - April 2023

- Integrated and consumed APIs to interface with a machine learning model designed for seismic fault detection.
- Processed and validated seismic data inputs to facilitate accurate and efficient fault marking.
- Optimized data pipelines to enhance communication between external APIs and the ML model.
- Collaborated with cross-functional teams to refine model performance and ensure reliable fault detection on seismic datasets.

Mocview, New York (remote) — Software Developer

June 2021 - September 2021

- Developed a candidate dashboard for an interview prep application using TypeScript and Next.js.
- Implemented features to track and analyze user activities for enhanced candidate insights.
- Designed an intuitive, responsive interface that streamlined user navigation and engagement.

SKILLS

Html, css, tailwind,
bootstrap, Javascript, React,
Nextjs, Nodejs, react native

Git, Github, Postman,
Firebase

LANGUAGES

English, yoruba

- Ensured robust performance and maintainability through the use of TypeScript's static type-checking.

Spatialnode, Akure (remote) — *software developer intern*

February 2021 - April 2021

- Developed a blog module on the platform enabling users to write their own posts or import content from Medium.
- Designed an intuitive interface that streamlined both original content creation and blog importation.
- Integrated third-party APIs to facilitate seamless content retrieval from Medium.
- Enhanced user engagement by offering flexible blogging options and a responsive design.

Devcareer, Lagos (remote) — *software developer intern*

June 2020 - August 2020

- Expanded knowledge of responsive design principles to enhance cross-device usability.
- Gained foundational skills in React and Node.js to support modern web development practices.
- Applied new insights to improve user experience and streamline development processes.

EDUCATION

Federal University of Technology, Akure — *Bachelor of Technology*

January 2018 - January 2024

Studying Applied Geophysics

School of Science Pade, Oyo state — *School Leaving Certificate*

September 2013 - September 2016

PROJECTS

Mernstack video chat Application —

An application that works just like google meet to chat and have a video call with people.
